

# wood hydracork

Hydrocork is a low thickness and waterproof floating solution that combines extreme performance with the comfort of cork. The innovative core made of composite cork is waterproof and incredibly stable, while its surface offers a wear resistance suitable for heavy commercial areas. The product's low thickness makes it also the optimal choice for renovation projects. The revolutionary PressFit compression system allows for a fast and easy installation.

## Formats

1225 x 195 x 6mm  
48 7/32 x 7 11/16 x 1/4"

Century Morocco Pine

## Reclaimed

Reclaimed wood visuals look great in a commercial space such as a boutique coffee.

The strong antique looking flooring has the ability to add history, character and personality to any space.

## Tradition

# No problem. It's ready for real life.

An open plan kitchen must boast a stylish vibe and sense of wellbeing with measured sobriety.

With Hydrocork, you no longer need to be worried if the floor is able to endure the test of time in a gracious way and how it resists impacts. You don't even need to fear over daily spillings due to its waterproof endurance.

Take advantage of it being ideal for renovations and place it on top of previously existing surfaces, or simply achieve a total look throughout your home with the same look in your kitchen, living room, bathroom and bedrooms.

Ten Traditional wood looks to choose from and complement with industrial, minimalist or even rustic designs.

## Cottage

Places where  
life is celebrated  
every day.

Flooring can either be the focal point of a room, or a background that aggregates other design elements. It's important to have a clear goal in each new design project in order to guarantee a consistent layout. When you've that figured out, it's with ease that you'll be able to extend your personality into your special space.

A bedroom should mirror relaxation and comfortable atmosphere to provide only pleasant moments. For a modern Cottage style that will be wrapped up with flooring as the background, choose a darker flooring hue that will enable the other decor elements to pop up.

# Finishing & Warranty

Suitable for Heavy Traffic Residential areas and Heavy Traffic Commercial areas.

\*Please see the terms and conditions of Wicanders Limited Warranty on the website.

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

TÜV-PROFICERT-product Interior brand is a voluntary, independent label for VOC-emission and quality of floorings. The results comply with the emission thresholds of AgBB, Belgian VOC regulation, Finnish M1 classification, BREEAM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/ commercial buildings.

An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

CE marking is a certification mark that indicates conformity with health, safety and environmental protection standards for products sold within the European Economic Area (EEA).
